Indicate measurements:

AL \_\_\_\_\_

HL \_\_\_\_\_

<sup>1</sup> AL: PS-300 widht light entrance | HL: PS-300 height light entrance | AT: Pre-frame total width | HT: Pre-frame total height  
AT= AL+200 mm; HT= HL+200 mm. The dimensions of the width of opening of the sub-frame are equivalent to the indicated dimen-  
sions of the width of opening of the sectional door.

**IMPORTANT:** It is only compulsory to use the Preframe 100x40 if one of the lateral openings inside the house is less than 80 mm.  
The preframe is made starting from the dimensions of the width of opening for the PS-300 sectional door. From 4,000 mm width of  
opening onwards, the preframe lintel is 350 mm.
