

Step 10

When the crossbar is in place, it will be easier for us to tighten and adjust the fabric.

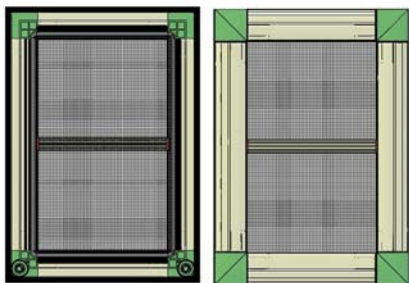

Step 11

Once the band is in place and with the help of a razor we will cut out all the excess fabric.

Step 12

The sliding mosquito screen is ready to be placed in the window frame.

The company thanks you for purchasing this mosquito screen; please read the contents of this document carefully and keep it.

This manual is an integral part of the screen and is intended to provide you with all the information you need for installation, use and maintenance.

The instructions, designs and documentation contained in this manual are of a technical nature and are the property of the company and may not be reproduced in any form, in whole or in part.

Assembly manual Sliding Mosquito Screen

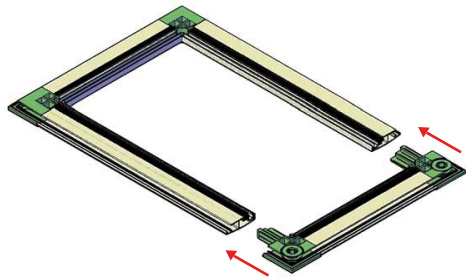

Step 1

Once the profiles have been cut to size, insert the brushes from the inside.

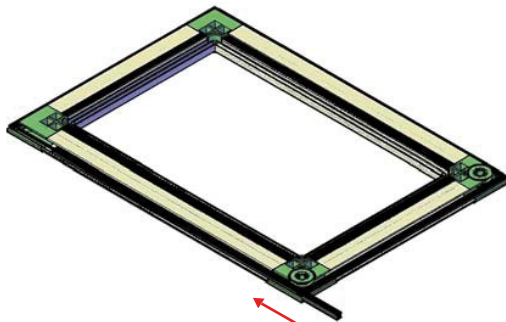

Step 2

Mount the upper and lower angles to their respective profiles.

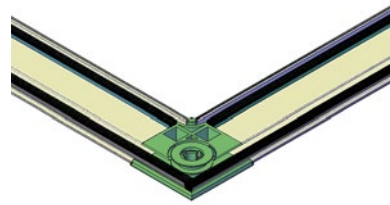

Step 3

Insert brushes from the outside of the profiles.

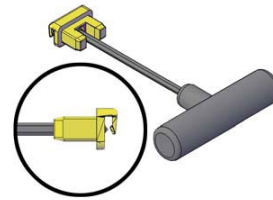

Step 4

The brush must reach the end of the butt plate at a right angle.

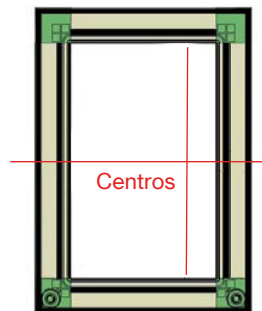

Step 5

Insert the studs into the plugs of the crossbar until they protrude approximately 0.5 mm from the inside and place them at the ends of the crossbar.

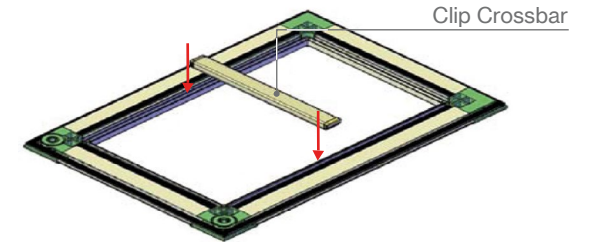

Step 6

Measure the inside opening of the mosquito screen and mark it in the middle to place the crossbar.

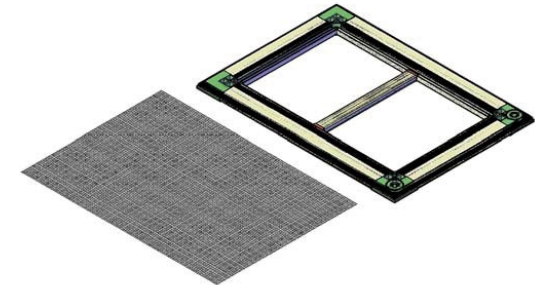

Step 7

Clip the crossbar to the centre of the frame with the help of the marks on the caps and those we have marked previously.

Step 8

Cut the mosquito netting giving a surplus of 50 mm. larger than the interior hole of the frame.

Step 9

Insert the rubber seal to fix the fabric.
