## Glass Curtains

**saxun**<sup>•</sup>  
Your world, our universe.

Saxun contributes to people's well-being and happiness by providing solutions that improve the spaces in their lives. We love space and the scope it offers to help us feel good. That's why we develop products that are functional, versatile and comfortable, so that you can make the most of your space in a variety of ways.

# The same space. Infinite options

Blur the boundaries with the outdoors by making the most of every inch of your space.

Our glass curtains give versatility to your corners, so you can enjoy the outdoors with all the confidence, security and protection of the indoors.

Allow yourself the luxury of enjoying the advantages of an enclosure, without sacrificing any of the light, transparency and visibility.

# Azur

## Folding Glass Curtain

# Made for your spaces. Designed for your life

The Azur folding glass curtain is a sliding glass curtain for balconies, terraces and porches. A simple and elegant solution that combines versatility and functionality, allowing a space to be completely opened or closed.

Maximum visibility

Optimisation of space

Easy access

Quality guarantee

Interior protection in the face of bad weather

Easy cleaning and maintenance

Child safety system

Folding Glass Curtain

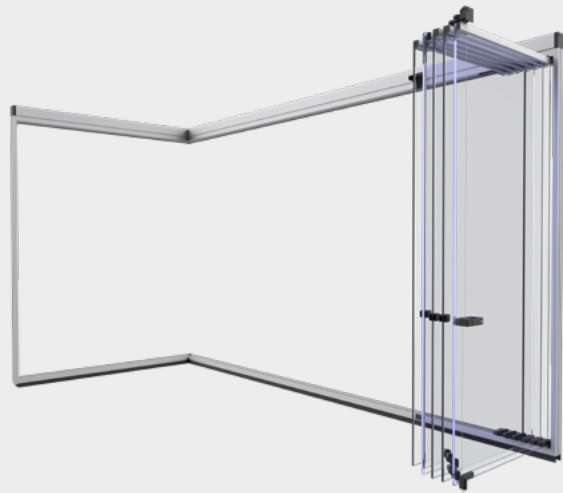

# Azur

Azur is a system composed of independent glass panes, with no vertical aluminium profiles, increasing visibility to its maximum expression.

It has the ability to slide and fold towards one end of the enclosure, remaining stacked on it, which allows it to be safely and easily cleaned.

Due to its characteristics, Azur is highly adaptable, as it can be installed on a wide variety of façade types.

An enclosure that allows you to protect the inside of your terrace from inclement weather.

Sliding and folding system

Sliding to the left and/or to the right

Locking of glass panels with lock on the inside or outside

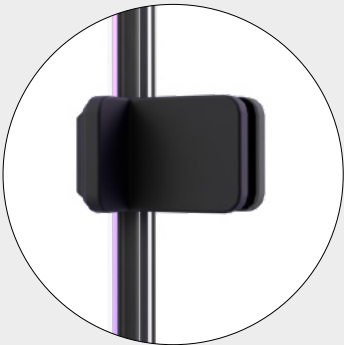

Convenient to use thanks to the pull-out parts of the panels

10 mm toughened glass glazing.  
Weight: 25 kg/m²

Variety of doorknobs

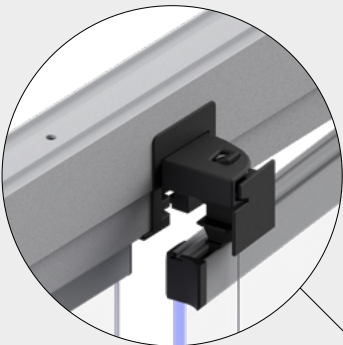

Handle

Discreet fixed handle, which allows the sliding of the glass leaves, avoiding direct contact and helping to keep the glass clean.

Opening support

This is the part on which the lock of the opening leaf rests. It allows a useful ventilation position that allows air to pass through, without having to keep the leaf open.

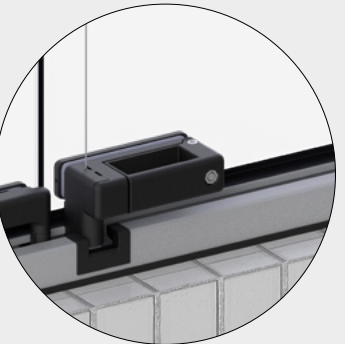

Anti-unhooking system pivot

It offers total security that the leaf will not become detached from the bed when it is open.

Medium doorknob

Simple doorknob for easy opening and closing of the leaf. Lock can be included.

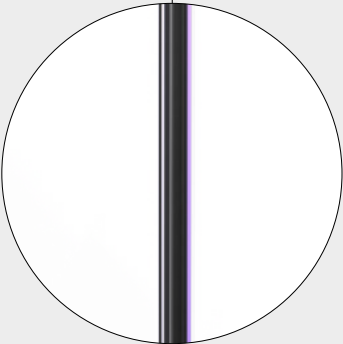

Low doorknob

A more discreet alternative, located at the bottom of the leaf. Lock can be included.

Clear PVC Insulating gaskets

Enclosure seals, with PVC, which allow the sealing between the leaves.

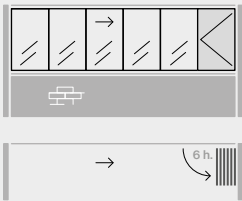

# Configurations

Systems consisting of one or more sections of panels, with or without an opening in each section. As a general rule, there is no limitation on the length of the sections, taking into account that the number of leaves must be a minimum of 2 and a maximum of 9 per opening.

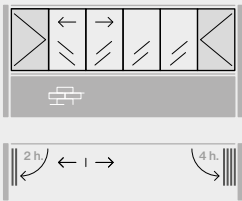

The width of the leaves or panels of the same section shall be between 400 and 1,000 mm. The height of the sections will vary between 500 and 3,000 mm, depending on the characteristics and needs, and may be different between adjacent sections, provided that they are not pass-angles.

## Types of section

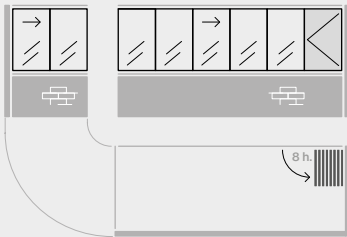

**Straight terrace.**  
Picked up on one side (right)

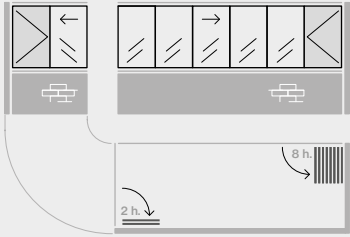

**Straight terrace.**  
Pick-up on both sides

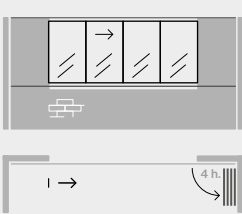

**Terrace at 90° angle.**  
Picked up on one side (right)

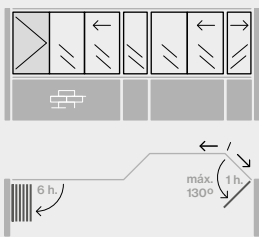

**Terrace at 90° angle.**  
Pick-up on both sides

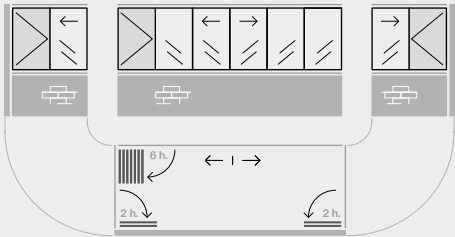

**Long profile with offset**

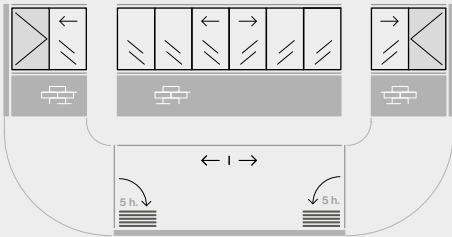

**Four-sided terrace with opening on both sides. 135° angle pass-through**

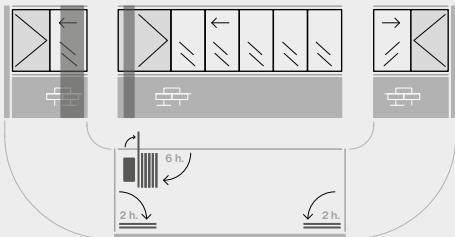

**Terrace 3 sides.**  
Collection on 3 sides.

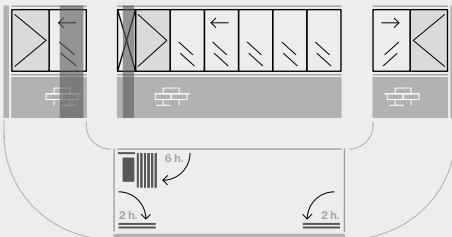

**Terrace 3 sides.**  
Pick up on 2 sides

**Terraces with obstacles.**  
Displaced axis

**Terraces with obstacles.**  
Fixed glass

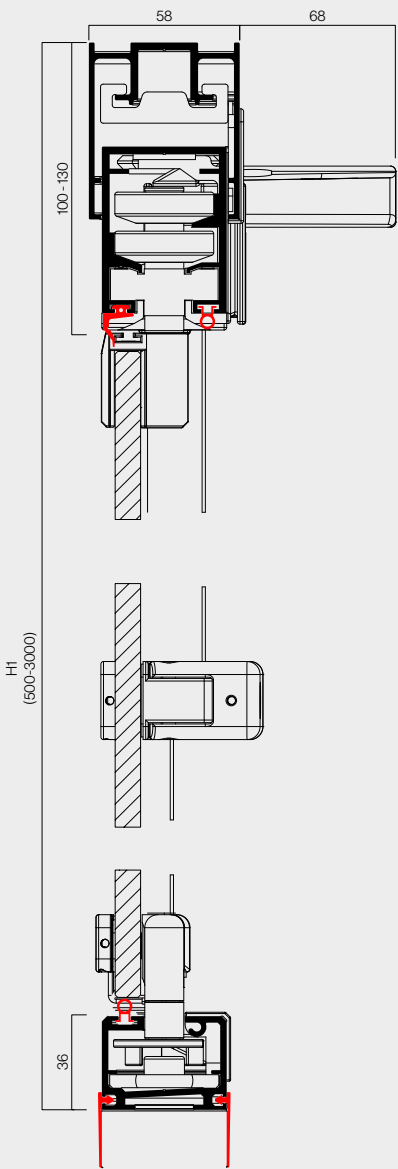

# Typologies

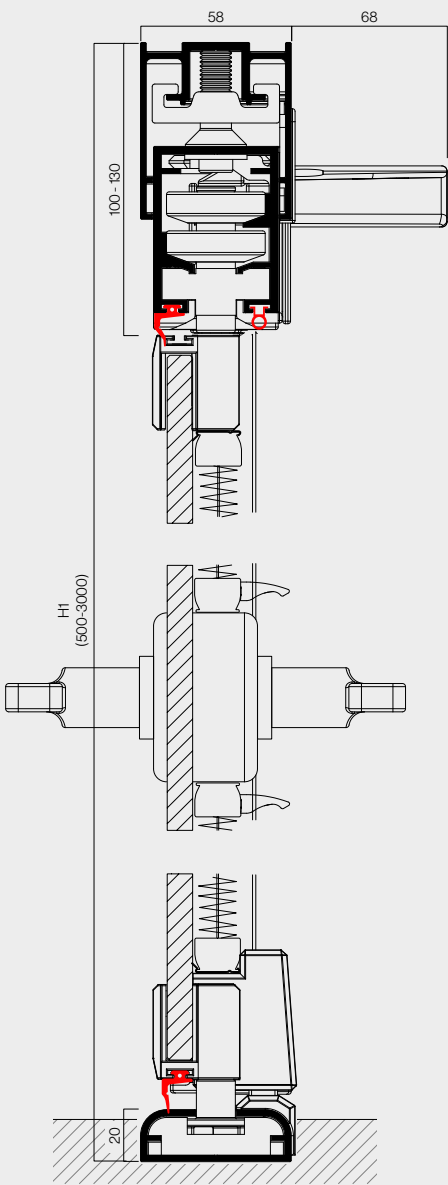

They can be installed from floor to ceiling, on walls or railings.

Azur Normal rail glass curtains are designed for non-trafficable spaces, i.e. to close gaps that cannot be traversed by people. For this reason, they are always opened from inside the home.

The Azur passable rail version is designed so that the bottom guide can be recessed, flush with the floor. This version is always installed from floor to ceiling, in transit areas and can open outwards. It is the ideal variant for porches and terraces as it allows traffic to pass through it.

# Projects

# The great partnership of hoteliers and restaurateurs

Our glass curtains have become a "must" for professionals in the HORECA sector. Its ease of use and installation makes every available centimetre of the business profitable, improving the use of terraces and exteriors throughout the year.

Create convertible spaces and decide whether it is an outdoor or indoor room depending on your needs. Enjoy the advantages of each one in the same space, with nothing more important than the comfort of the users.

Take advantage of all the luminosity, transparency and visibility offered by the exterior, without renouncing the comfort of indoor spaces.

Elegant and minimalist systems, made to measure, that allow the renovation of spaces, modifying their amplitude and separating rooms. In addition, they provide extra functionality for every moment.

Azur and Astron. Glazing solutions for companies that want to expand their world.

# Indispensable in the new architecture

Saxun glass curtains have become the wild card for architects and planners who want to give character to façades with a minimalist style, while making the most of every centimetre of space.

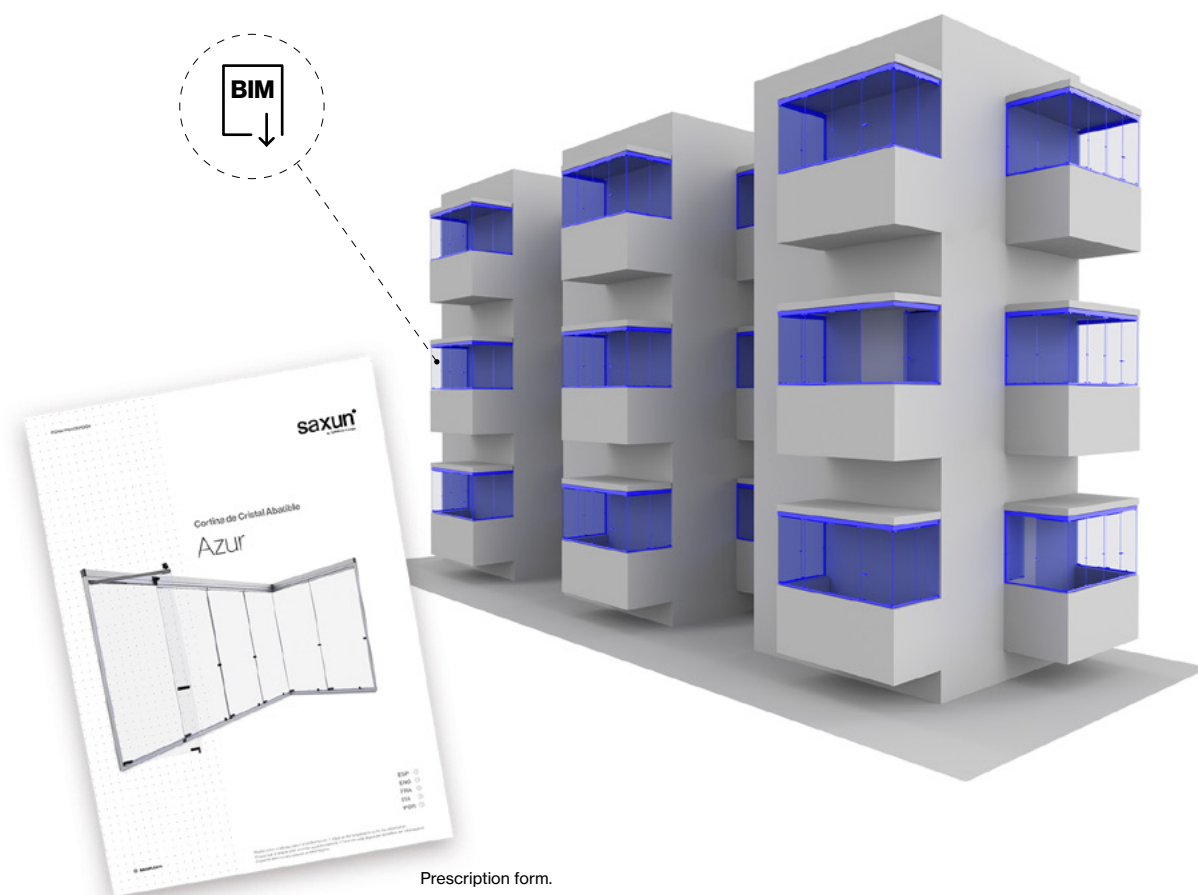

Beautifying buildings all over the world, more and more architects and designers are relying on this enclosure solution to bring comfort to homes from the ground up.

Saxun's glass curtains, which boast a multiplying effect on the functionality of spaces, allow users to take advantage of the benefits of indoor spaces, such as

safety and comfort, without having to give up the benefits of the outdoors, such as maximum visibility and natural light.

Their quick and easy installation also makes them the perfect solution for HORECA scenarios, where the versatility of the spaces prevails, given the changing needs of the users. Ideal for projects of all sizes in the hotel and catering industry.

To this end, we provide the necessary resources for the inclusion of these products in the initial phase; BIM files, dwg. and prescription sheets to conceptualise new spaces from the very beginning.

Prescription form.

Saxun offers the widest range of enclosures, sun protection and decorative treatments on the market to improve the spaces in your life, accommodating your needs and style, so that you can feel secure and at ease.
