

Mini Solar, easy, clean and sustainable

Mini Solar, Saxun's solar powered external roller blind, is the most sustainable and easy to install option for protecting and insulating all types of spaces.

It incorporates a discreet solar panel in the box, with a motor installed inside, for autonomous and remote operation.

As no prior electrical installation is required, it is very easy to assemble.

Ideal for inclusion in refurbishment or renovation work, with an avant-garde touch.

Saxun's most efficient, simple and sustainable option to protect your home.

Sun Protection System

Mini Solar is the first barrier against solar radiation. Located on the outside, it prevents heat from being transmitted to the window and entering the room.

Easy installation

No electrical pre-installation required. The product comes out of the packaging ready to be placed in the opening to be protected.

Energy savings

Its drive by means of renewable energy from the sun enables real and effective savings to be made in electricity consumption.

Smart use

Fully motorised operation controlled by a transmitter and/or an app via a HUB.

Sustainability

The use of this system, through a renewable energy source such as solar energy, makes it a fully sustainable system.

Your world, our universe.

Mini Solar

**Quick assembly,
easy and efficient
installation**

1

Take the blind out of the box it came in and hook the guides to the box.

2

Insert the structure into the window or door opening.

Maximum adaptability

Designed to suit any architectural style, these blinds are the perfect solution for all types of homes. Our system fits effortlessly into any kind of windows and doors, offering a contemporary touch with the eco-efficiency of the Sun.

Powered by the Sun

A few hours of sunshine are enough to charge the battery inside the box and ensure reliable use for weeks. Discreet solar panels that respect the aesthetics of the façade.

Smart drive

We give you the possibility of controlling your solar blind through a transmitter and an app compatible with iOS and Android, which means you can also operate it using your mobile device or voice assistant, connected to a HUB.
